Customer Notes

SUV Size

Small SUV: Generally speaking if a 6' tall man needs the assistance of a step stool or ladder to either wash or polish the SUV's roof than the SUV is NOT considered small. This is not an absolute rule and we reserve the right to make SUV size determinations. Vehicles with 3 rows of seating will most always be considered a "Large". "XL vehicles size prices apply to full-size truck or SUV.

Disclaimer

FinishLine will not be liable for damages that occur with normal described procedures. Vacuum / Window and Hand Wash services are not available on their own. It is the responsibility of the customer to inform FinishLine of any recent body work, interior fabric or leather dying, or any other such repairs. Finished details are parked on an interior wall. This is an open air garage, meaning there may be a light amount of pollen, dust, and fog/mist present on finished details. Vehicles are detailed rain or shine. We generally perform services one calendar day before the customer's scheduled return date. We make every effort to complete every service requested, even same day returns. Stays of 48 hours or less do not always allow us enough time to complete a service, especially during holidays, school breaks, and three day weekends. When the weather is below freezing, detailing on the outside of vehicles is no longer possible.

Additional Labor / Time Allotment

The time allotment allows us to clean your average dirty vehicle entirely. Only extremely dirty / over-sized vehicles require additional labor. We will stop the service at our maximum time allotment unless the customer requests additional labor. Time spent removing and replacing vehicle contents is counted towards the time allotment. Common examples that would require extra labor to clean the vehicle entirely and to satisfaction include: Animal/Kid cars, Smokers, Paint Oxidation, Tar/Sap/Road Paint/Overspray Removal.
